

FILLING DEVICE HAVING LATERAL FILLING WINDOWS

The present invention relates to a filling device for a writing instrument having a reservoir (6, 6a) positioned in a housing (1; 8, 7) for a refillable liquid. A wick-like section of a writing tip (2) exposed on one end (7) of the housing (1) projects into this reservoir (6), a filling spout (4) for the liquid able to be attached to the other end (8) of the housing (1) and a movable dosing cap (5) being provided on the filling spout (4) in order to expose at least one filling opening (14, 14a, 11) for supplying the liquid before reaching an end position of the dosing cap.
